Water Detection, Leak Rope

IPower provide Water Leak Detection in a range of Lengths from 1.0 Mtr to 18.0 Mtr, plugging directly into your IPower PDU (meaning the is no need for additional Power Supplies).

The Water Leak Detection provides valuable protection for your Servers and Equipment against damaging water leaks from malfunctioning HVAC systems, cafeteria accidents, or any general plumbing failures in your facilities.

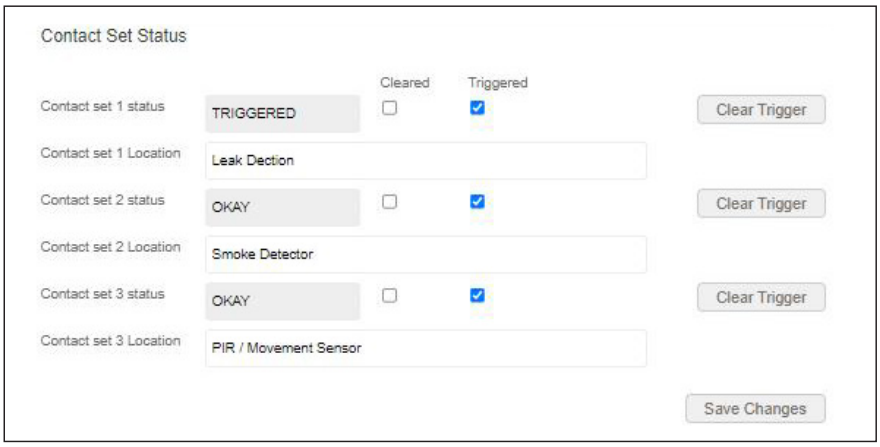

Simply lay its sensing cable around your equipment, place it on the floor or beneath a raised floor, inside a drop-ceiling or in the rafters between floors, anywhere you must know about water near your equipment.

SPECIFICATION	
Lead In Cable	2.0 Mtr (Other Lengths Available)
Water Sensing Cable Length	1.0 – 18.0 Mtr (Please Specify)
Voltage	5.0 VDC (Supplied from PDU)
Audible Alarm	Yes

PART NUMBER	
9901-IPT-500-900-05M	5.0 Mtr
9901-IPT-500-900-10M	10.0 Mtr
9901-IPT-500-900-15M	15.0 Mtr
Other Lengths available on request	

When Connected to the Volt Free Contact Port on the iPower PDU, you can configure the Sensor to send email and SNMP alerts in the event of water being detected.
